

RFT – 800 all-in series

Compact small headend ready set

RFT-800 all-in products are signal processing headend for QPSK , COFDM, QAM and AM stereo signals.

SD and HD compatible units are available.

Single (RFS) or twin (RFT) all-in units are perfect for stand-alone installation or expanding existing headend.

Receivers and modulators are simple to program with the remote controller unit .

The packing includes single or twin unit, power supply and programmer.

The units includes CI slots for the most common CA modules.

Software update possible via USB port.

Features

- ❑ Compact ready set headend
- ❑ Twin (RFT) and single (RFS) units available
- ❑ Includes power supply and programmer
- ❑ For HD and SD programs

SD units

RFS-831

- ❑ Single QPSK/AM remodulator

RFT-831

- ❑ Twin QPSK/AM remodulator

RFS-835

- ❑ Single QPSK/COFDM remuxer

RFT-835

- ❑ Twin QPSK/COFDM remuxer

RFS-836

- ❑ Single QPSK/QAM remuxer

RFT-836

- ❑ Twin QPSK/QAM remuxer

HD units

RFS-845

- ❑ Single 8PSK/COFDM remuxer

RFT-845

- ❑ Twin 8PSK/COFDM remuxer

RFS-845

- ❑ Single 8PSK/QAM remuxer

RFT-846

- ❑ Twin 8PSK/QAM remuxer
